

Masterclass Biogas

**ENERGY
DELTA
INSTITUTE**

Part of New Energy Coalition

Everything you need to know about the gas of the future

23-24 November 2020

Online

English

2 half days

All levels

€ 600.-

Open market

Topics

- Production and transport of renewable gas
- Upgrading biogas to biomethane
- Certification of biogas and biomethane
- Future scenarios for biogas supply and demand
- Policy, regulatory issues and subsidies
- Business models and business cases

About the programme

This two-morning virtual class takes the participants in a helicopter view around the key parts of the rapidly evolving biogas value chain and it does so in cooperation with European Biogas Association.

This Masterclass offers a tour d'horizon of the complete biogas value chain: from biomass to biogas production, upgrading, distribution and consumption. It also looks at regulatory and public acceptance issues around renewable gas and various applications, e.g. in mobility.

Masterclass Biogas

What's in it for me?

Upon completion of this programme, the participants will be able to:

- Complete overview of latest developments and all aspects of biogas business
- Identify opportunities in biogas
- First-hand experience of biogas production

Get overview of complete biogas value chain

Anticipate challenges and opportunities

Network with experts and peers

For who?

The course provides an overall overview to the topic biogas and is therefore particularly interesting for people who are relatively new to this topic. It also offers people with more experience the ability to get completely up to date with the latest developments and to gain knowledge of the entire value chain.

Certification

Participants of Masterclass Biogas will receive a certificate on behalf of Energy Delta Institute. This Programme will contribute to your continuing professional development.

Investment

€ 600.- (Accommodation costs and VAT excluded)

Energy Delta Institute (EDI) is an international energy business school. Our mission is to bring together world-class knowledge and business skills to educate and inspire energy professionals, so that they can become the new leaders of a sustainable energy future. The changing energy world is forcing companies to innovate in order to stay competitive. Through a rich variety of energy training courses and networking activities we prepare energy professionals for challenges they face in this dynamic environment. The energy community has come to appreciate EDI as a platform on which both partners and participants can exchange energy knowledge. In addition, the energy sector faces the possibility of a growing shortage of qualified personnel over the coming decades. The sector has only one choice: to invest in knowledge.

EDI was founded in 2002 by Gasunie, Gastera, Gazprom and the University of Groningen, and was later joined by Enagás and Shell.
